SUMMARY

Computer Engineering student specializing in Artificial Intelligence and Machine Learning with strong full-stack development experience. Skilled in building data-driven web applications using Django and the MERN stack, with hands-on experience in backend systems, APIs, and ML integration. Focused on deploying scalable, real-world solutions by combining machine learning with modern web technologies.

EDUCATION

LJ Institute of Engineering and Technology, Ahmedabad
Bachelor's in Computer Engineering (AIML) *(Pursuing)*
Expected Graduation: 2027

ITM SLS Baroda University, Vadodara
Diploma in Computer Science and Engineering *(Aug 2021 – May 2024)*
CGPA: 8.05 / 10

Relevant Coursework: Data Structures, Algorithms, Operating Systems, Computer Architecture, Information Security

SKILLS

Languages: Python, Java, JavaScript
Backend: Django, Node.js, Express
Frontend: React, HTML, CSS, Tailwind CSS, Anime.js, Three.js
Databases: MongoDB, Firebase, MariaDB
Machine Learning: Scikit-learn, Pandas, NumPy
Tools: REST APIs, JWT Authentication, GIT version control, Jasper Studio

Certifications:

- IBM – Introduction to HTML, CSS, JavaScript
- IBM – Exploratory Data Analysis for ML
- Scaler – ReactJS
- IBM – Backend Development with .NET

EXPERIENCE

Software Developer Intern
Payguru Technosoft Pvt. Ltd., Vadodara, Gujarat
September 2025 – March 2026 (6 months)

- Developed Python-based applications to interact directly with biometric devices for retrieving attendance data, punch logs, and user information
- Built an automated user-blocking service that restricts system access when employee work orders expire
- Contributed to the development and maintenance of an HRMS mobile application using Flutter
- Designed and generated dynamic reports using Jaspersoft Studio for HR and operational use cases
- Worked on backend logic, data handling, and system integrations to support internal HRMS workflows

---

PROJECTS

Smart Inventory Intelligence Platform (Full-Stack + ML)

- Built an enterprise-grade inventory system using React, Node.js, MariaDB, and FastAPI
- Developed real-time stock tracking, audit logs, and inter-warehouse transfers
- Created ML microservice for demand forecasting, anomaly detection, and stock prediction
- Implemented EOQ-based smart reordering and time-series forecasting
- Built secure APIs with JWT authentication and RBAC
- GitHub: https://github.com/nerdyADITYA/Smart_inventory
- Live URL: Smart Inventory

Appointment Manager (Full-stack MERN Application)

- Built a full-stack appointment scheduling system using React, Node.js, Express, and MongoDB
- Developed secure authentication with OTP-based email verification and session management
- Implemented real-time slot booking with capacity tracking and dynamic availability updates
- Designed role-based dashboards for customers and admins with booking and slot management features
- Built REST APIs for bookings, user management, and slot handling with proper validation and security
- Integrated email notifications for booking confirmations and updates using Nodemailer
- Optimized frontend performance using React Query for efficient data fetching and caching
- GitHub: https://github.com/nerdyADITYA/Appointly.git
- LiveURL: Appointly

F1 Podium Predictor (ML + Django)

- Built a Django app predicting race podiums and finishing positions
- Used RandomForest models for classification and regression
- Integrated real-time race parameters (weather, lap times, qualifying data)
- GitHub: https://github.com/nerdyADITYA/F1PodiumPredictor
- Live URL: F1 Podium Predictor

Expense Tracker (MERN Stack)

- Developed a full-stack app for tracking income and expenses
- Implemented JWT authentication and real-time dashboards
- Built interactive charts for financial insights
- GitHub: https://github.com/nerdyADITYA/ExpenseTracker
- Live URL: Expense Tracker

AgroAnalytics (ML + Django)

- Built a crop prediction system using environmental data
- Implemented ML models using scikit-learn
- Performed data preprocessing and feature extraction with Pandas
- GitHub: https://github.com/nerdyADITYA/Agro_Analytics
- Live URL: Agro Analytics
